

Dr. V. VIVEK, MRCP (UK)  
Consultant Nephrologist

Dulal Chandra Saha To/M 4836050.

To,

Dr. N. Ragavan, Consultant Urologist.

Dear Dr Ragavan,

Thanks for referring this gentleman with diabetes, hypertension, stable anemia (Cr 2 in 2020 & Cr 1.7 now), trace proteinuria & no diabetic retinopathy. He has a dilated left ureter with perinephic fat stranding. He probably has a combination of hypertensive nephropathy & chronic pyelonephritis. I have advised an appropriate diet & regular follow up. Please let me know regarding the plan for his obstructive uropathy. His renal function will need monitoring around the time of any procedure.

Regards,

*h. Vivek*
