In the preparation of the above report, I duly declare that the report and opinion rendered is correct and true. The opinions rendered in this case were based upon reasonable medical probability, clinical assessment, examination and documentation. This evaluation had been conducted on the basis of the medical examination and documentation as provided, with the assumption that the method is true and correct. If more information becomes available at a later date, an additional report may be requested. Such information may, or may not change the opinions rendered in this evaluation.

Yours Sincerely

Dr S S Sathappan
