

Name	<b>Hasyamaye Basak</b>	Age	44 Yrs.
Referred by	<i>Asst. Prof. Dr. Shantona Rani Paul, MBBS, MS, FCPS</i>	Sex	Female
Lab Number	<b>48,651</b>	Date	4-Jun-23
<b>USG of Both Breast</b>			

**SEEN BY 7.5 MHZ TRANSDUCER.:**

**Right Breast:**

Right breast shows normal echopattern.  
Fat lobules and parenchyma are well identified.  
All ducts appear normal.

A small anechic lesion of about 19 x 13 mm is noted in right breast at 3 O' clock position.

**Left Breast:**

Left breast shows normal echopattern.  
Fat lobules and parenchyma are well identified.  
All ducts appear normal.

Two small anechic lesions are noted in left breast at 3 O' clock position, larger one is measuring about 31 x 14 mm.

**Axilla:**

No lump or lymphnode is seen in any axilla.

**IMPRESSION:**

- ◆ Suggestive of bilateral breast cysts.
