### ULTRASONOGRAPHY REPORT

LIVER	:	Liver is normal in size and uniform in tissue appearance. No focal lesion is seen in the liver parenchyma.
GALLBLADDER	:	Gall bladder is normal in size and appearance. No stone or debris is seen inside gall bladder.
BILIARY TREE	:	Biliary tree is not dilated.
PANCREAS	:	Pancreas is normal in size and appearance.
SPLEEN	:	Spleen is normal in size and uniform in appearance.
KIDNEY	:	<b>Right kidney measures about 8.8x3.5 cm and left kidney measures about 8.0x3.6 cm. Cortical echogenicity is increased and cortico-medullary differentiation is reduced.</b> No hydronephrosis, calculus is seen.
URETERS	:	Both are not visualized.
URINARY BLADDER	:	Urinary bladder is well filled and well outlined.
UTERUS	:	Normal in size and anteverted in position. Myometrium is uniform. Endometrium is thin. Cervix is normal.
ADNEXA	:	<b>A cyst measuring about 3.9x2.6 cm is noted in the left adnexa.</b> No significant right adnexal abnormality seen.
PVR	:	<b>Unremarkable.</b>

**COMMENT: Suggestive of bilateral renal parenchymal disease.  
Left adnexal cyst.**
