

## ULTRASONOGRAM REPORT

I.D. No : G18665 Received date : 28 Dec 2023 Printed date: 28 Dec 2023 08:51AM  
Name of Pt. : RIKO Age : 28 y(s) Sex: Male  
Referred by : PROF. DR. M. FAKHRUL ISLAM MBBS,PHD  
Part Scanned : USG WHOLE ABDOMEN WITH PVR

### USG OF WHOLE ABDOMEN WITH PVR

*Thank you for the courtesy of this kind referral*

**Liver:**

Normal in size (11.4 cm) and uniform in parenchymal echotexture. No focal lesion is seen. Intrahepatic biliary channels are not dilated.

**Gall bladder:**

Gall bladder is normal in size. No calculus could be seen within GB. CBD is not dilated.

**Pancreas:**

Normal in appearance. MPD is not dilated.

**Spleen:**

Normal in size with homogeneous parenchymal echotexture. Spleno-portal venous system is not dilated.

**Kidneys:**

**Right kidney** is normal in size (10.1 cm) shape and position. Renal margins are regular and smooth. Cortico-medullary differentiation is intact with normal cortical echogenicity. Pelvicalyceal system of right kidney is not dilated.

**Left kidney is enlarged in size (13.3 cm)**, normal in shape and position. Renal margins are regular and smooth. Pelvicalyceal system & adjacent upper part of ureter is also moderately dilated, rest of the ureter is appeared to be normal.

**Urinary bladder:**

**Urinary bladder is low in capacity (57 cc) & ill-defined.** Wall thickness is about 2.7 mm. No demonstrable intravesical lesion or calculus could be seen.

**PVR : About 10.2 cc.**

**Prostate:**

Normal in size (2.2 x 3.7 x 3.5) cm & weight about 15.6 grams (normal <30 grams). It shows homogeneous echotexture with smooth margin and intact capsule.

**Others:** No evidence of pleural effusion or ascites is seen.

No abnormal mass or free fluid collection is seen in right iliac fossa.

**IMPRESSION: 1. Left sided moderate to gross hydronephrosis.  
2. Low in capacity of urinary bladder – (?) thimble bladder.**
