## IMMUNOLOGY REPORT

Invoice No : V2203330582 Invoice Date : 07/03/22 Delivery Date : 12/03/22 Report No : 12203797515  
 Patient Name : MR. SHOHEL RESVE Age : 33 Y Gender : Male  
 Address : Contact No. : 01927704798  
 Referred By : PROF. DR. KHWAJA NAZIM UDDIN MBBS FCPS(MED) FRCP FACP , Ex.Professor

Sample Type : STOOL LAB No : 12203136940  
 Tests : Fecal Calprotectin (fCAL)  
 Sample Collected: 07/03/22 02:30 pm Sample Received: 07/03/22 04:18 pm Released Time : 07/03/22 08:10 pm

Test	Result	Unit	Reference Values
Fecal Calprotectin (fCAL)	185	µg/g	<80: Normal 80-160: Borderline (Follow-up within 4-6 weeks) >160: Elevated

Method : Immunoassay

- Note :
1. Fecal calprotectin values are intended as an aid to diagnosis in distinguishing organic disease from functional disease and as an aid to IBD monitoring. Results should always be interpreted in combination with other clinical and laboratory findings.
  2. For IBD disease monitoring, multiple fecal calprotectin measurements performed at up to 4 weeks intervals have been suggested to have best diagnostic accuracy in predicting clinical relapse in patients.
  3. Patients who are taking NSAIDs regularly may have elevated fecal calprotectin levels.
  4. Results may not be clinically applicable to children less than 4 years of age who have mildly increased fecal calprotectin levels.
