RADIOLOGY SERVICES

ID No. :	600008175	RIS No. :	60011065
Patient Name :	Md. Jahangir Hossain	Age/Gender :	55 Y/M
Referred By :	Asst. Prof Dr. M.S. Arefin Patwary, MBBS (DMC),FCPS (Medicine), MACP (USA) # JAT	Bed No/Ward :	OPD
Report Date :	21/08/2023 12:10PM	Scan Date :	21/08/2023
		Report Status :	Final

Ultrasonogram of Scrotum

Right testes: Normal in size, shape and position, measuring about 3.2 cm x 2.0 cm x 2.0 cm & volume is about 7 cc. Parenchymal Echotexture is homogeneous. No evidence of focal lesion or cyst or solid mass or inflammatory lesion or hydrocele is seen. Head of the epididymis is normal in size and homogeneous in echotexture. Veins of the pampiniform plexus are not dilated. Color Doppler flow shows normal vascularity within testes and epididymis.

Left testes: Normal in size, shape and position, measuring about 1.9 cm x 3.7 cm x 1.9 cm & volume is about 7 cc. Parenchymal Echotexture is homogeneous. No evidence of focal lesion or cyst or solid mass or inflammatory lesion is seen. **Moderate collection of fluid with echogenic debris is seen in the left testis.** Head of the epididymis is normal in size and homogeneous in echotexture. Veins of the pampiniform plexus are not dilated. Color Doppler flow shows normal vascularity within testes and epididymis.

Comment Left sided moderate Hydrocele.
