## ENDOSCOPIC PROCEDURE REPORT

Procedure : EVL

Indication : N/A

Medication : Pofol-100ml & Fentanyl-2ml

### Findings :

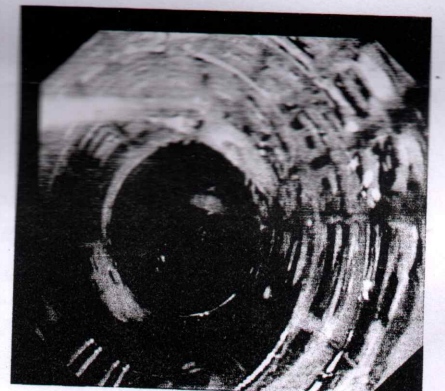

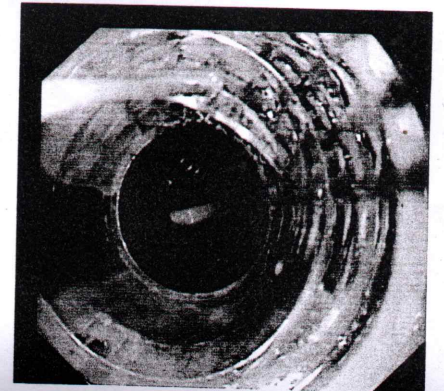

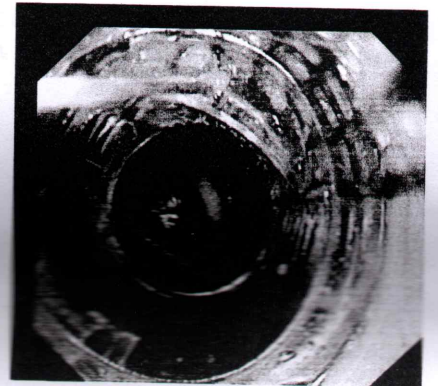

#### Oesophagus :

Multiple columns of grade III-IV varices noted.

#### Procedure :

EVL done using 7 shooter oesophageal banding device with full aseptic precaution. Three bands applied to the oesophageal varices from lower end of oesophagus spirally from below upwards. Haemostasis ensured. Pre and post EVL Sessions uneventful.

Advice : Follow up endoscopy of UGIT after 1 month.
