## Computed Tomography Report

ID No. : **RJ264447**  
Patient's Name : MR. MINHAJ  
Refd. By : Dental Unit, Sadar Hospital, Rajshahi  
Specimen : Spiral CT Scan of Face

Date: Mon 29/11/21  
Age : 20 Year(s) Sex : Male

### CT SCAN OF FACE

**CLINICAL HISTORY** : Swelling in the right lower jaw.  
**TECHNIQUE** : Multiple axial non-contrast & contrast CT scan were performed.

### \*\*REPORT DETAILS\*\*

- There is large expansile osteolytic growth with cortical thinning measures about 7.5x5.8x4.0 cm is seen in the body and ramus of right hemi-mandible. Heterogeneous enhancement is noted following contrast administration.
- No growth is seen in the oral cavity.
- Para nasal sinuses are unremarkable.
- No evidence of lymphadenopathy is noted.
- Nasopharynx, oropharynx & other soft tissues unremarkable.

### IMPRESSION:

A large expansile osteolytic bony growth in the body and ramus of right hemi-mandible, suggestive of Ameloblastoma and needs biopsy for further evaluation.
