## ULTRASONOGRAPHY REPORT

Registration No: 814880	Date: 8 July 2024	
Name: AMIR HOSSAIN	Age: 48 Years	Sex: M
Referred by : DR: SHARIFUL ISLAM.MBBS.BCS (H).FCPS.(M).		
Ultrasonography of <i>Whole Abdomen</i>		

-Thank You For Your Kind Referral-

### Whole Abdomen:

**Liver** is normal in size (L:13.4cm), shape & position with uniform parenchymal echotexture. No focal lesion is seen. Hepatic veins are not congested. Portal vein appears normal in caliber.

**Gall bladder** is normal in size, shape & position with normal wall thickness & clear lumen. Intrahepatic biliary tree is not dilated. Common bile duct is normal in diameter.

**Pancreas** is normal in size, shape & position with uniform parenchymal echotexture; main pancreatic duct is not dilated.

**Spleen** is normal in size (L:8.4cm), shape & position with uniform in tissue appearance.

**Both Kidneys** are normal in size (RK:9.1cm, LK:9.2cm), shape & position. Parenchyma shows normal echotexture with well-defined cortex and medulla. **Pelvicalyceal systems of right kidney is moderately dilated. Highly reflective an echogenic structure with prominent posterior acoustic shadow, measuring about 8.1 mm is noted in upper polar region of right kidney. Color Doppler shows twinkling artifact.**

A cystic area without septation noted in cortical region of left kidney.

**Adrenal glands** are not enlarged. No definite abnormality is seen in adrenal regions.

**Right ureter is dilated. Lower ureter couldn't evaluate properly due to overlying gas shadow empty UB.**

**Excess abdominal gas is noted, which obscure USG beam.**

### Impression: Sonographic features suggestive of:

• **Small right renal stone with moderate hydronephrosis.**

- **Left renal cortical cyst.**

(Please send the patient with full bladder to see VUJ & lower ureter to exclude any stone)
