

Patient Name	: Mr . ATIAR RAHMAN	Reg No	: BAN042401850
Age/Gender	: 42 Y(s) / Male	Reg Date	: 18-Apr-2024 17:34
Ref.Dr	: LV Prasad Eye Institute	Reported Date	: 19-Apr-2024 14:28

Chiasm appears unremarkable.

IMPRESSION:

* Multifocal small, non-enhancing patchy areas and foci of T2, FLAIR hyperintensities noted in bilateral periventricular and fronto-parietal white matter.

-Likely consistent with grade I-II chronic small vessel ischaemic changes.

* Generalized cerebral atrophy.

* Diffuse thinning of both retrobulbar optic nerves, with mildly prominent perioptic CSF spaces with no obvious signal abnormalities/abnormal post contrast enhancement.

-Likely consistent with Optic atrophy.
